applied lightly with a wad of cotton. Use the color well diluted and do not have too much on the wad. Test on another piece of paper before applying to the actual map.
6. When map is thoroughly dry apply a coat of thin, clear lacquer with brush and repeat until you have the desired finish. Spray-lacquer in small cans sold at art stores is very good for this purpose. If surface will be subject to wear, such as on table tops or trays, use at least four coats. Be sure that each coat is dry before applying the next one. Obtain alcohol resistant lacquer in case this would be desirable.
There are countless other items that can be made more attractive and interesting by the application of maps. For example:
ASH TRAYS
CIGARETTE BOXES
COFFEE TABLES
COMPOSITION BOOKS
DESK TOPS
DIARIES
WALL PLAQUES
WINDOW SHADES
TROPHY CASES
MOUNTING DIRECT TO WALLS.

Easy Steps to follow
IN DECORATING
LAMPS • TABLE TOPS • TRAYS • WASTE BASKETS
BOOK COVERS • CORRESPONDENCE FOLDERS • WALLS
CABINETS • PLAQUES • SCRAP BOOKS
FLOWER POTS • TRINKET BOXES • SHADES
1. Select a map which for size and coloring seems best suited for use on the object to be decorated. Cut it out of the sheet. Place it on the object and move it around until you get the most artistic effect. If not entirely satisfied with your first selection, try a few other maps.
2. Now, indicate on the object where the map is to be applied. Pencil or crayon marks at the corners will serve as guide lines, or you may prefer to use strips of masking tape to frame the area.
3. You are now ready to mount the map. Turn the map face down on clean wrapping paper and spread adhesive evenly on back. Use library paste, mucilage, or one of the special adhesives in tubes. The latter is best when map is to be mounted on a glossy surface. When map is to be applied directly to painted or wallpapered wall, use ordinary wallpaper paste. Be sure to follow directions on the adhesive package. This type of paste is best for large maps.
4. Now place map on object to be decorated. Press it firmly into place, smoothing with hands from center outward to eliminate all air bubbles. Remove extra adhesive and allow to set. Be sure edges stay down.
5. Any map can be given an antique effect by dampening and ironing with a hot iron until the paper is lightly "browned." If you prefer, color the map with sepia water color, walnut stain or iodine
